PROJECTS

WORDLEARNER | Live project
https://github.com/Sahil-Badkul/wordlearner

- Word learner is a platform that helps learners/students a lot in learning English. It is very helpful platform for students who have trouble remembering English word.
- In this, you just have to save the word and its meaning and whenever you want to revise, you can do it through **random algorithm.**
- Tools and technology used : HTML, CSS, JavaScript, Bootstrap.
- Live project used by **10-15** friends.
- Responsibility to develop and promote project.

TRUEFRIEND |Minor Project
https://truefriend3.herokuapp.com/
Nov. 2021 – Jan. 2022| India

- A web application which helps students by providing information regarding hostels and messes in nearby college.
- This application has multiple screens build using CURD operation.
- Tools and technology used : **React.js, Firebase.**
- Responsibility : Designing frontend.

Achievements

- **AIR 1st** in April long challenge hiring challenge at **code-chef**.
- **AIR 213th** in jobathon challenge **GFG**.
- Achieved **385th** global rank in July lunch time code-chef.
- **450**+ problem solved at **Leetcode**.
- **500**+ problem solved at **Hacker Rank**.
- **150**+ problem solved at **Interview Bit**.
- Participate in Skill India Hackathon.
- **Ranked 1st** in Institution at prestigious platform Interview Bit.
- **Gold medalist** in **Problem solving** & MySQL in Hacker rank.
